Team Approach to Guided Surgery

Presented by
Dr. Yong-Han Koo

Wednesday, May 31, 2017
Tonawanda, NY

Co-sponsored by:

Team Approach to Guided Surgery

This program is specifically designed to provide a unique insight into 3D implantology from start to finish. There are multiple workflows and entry points into digital planning and guided surgery. The main objective is to share proven digital workflows that facilitate communication between the surgeon, restoring dentist and the patient during case presentation enabling them all to become active participants in the treatment planning process. Dr. Koo will highlight several of the premier software and guide solutions with fully digital workflow capacities including high level functions like bone reduction, immediate load, sinus lift, provisionalisation and abutment ordering in the software. This will aid in achieving an ideal, functional, and esthetic outcome with high predictability in a minimally invasive manner.

At the completion of this program, each participant will be able to:

- Appreciate and understand the value of safety and precision in dental implantology utilizing CBCT guided software from the diagnosis and treatment planning phase to the final surgical and prosthetic execution phase.
- Propose treatment plan from a perio-prosthetic perspective using 3D CBCT in order to provide an ideal, functional, and esthetic outcome.
- Understand the key determining factors affecting long-term stability.

Program at a glance

Date	Wednesday, May 31, 2017
Time	5:30 - 6:00 pm <i>Registration and dinner</i> 6:00 - 9:00 pm <i>Lecture presentation</i>

Featured speaker

Dr. Yong-Han Koo graduated from Columbia University College of Dental Medicine and completed his oral and maxillofacial surgery residency at Yale-New Haven Hospital/Hospital of St. Raphael. Dr. Koo has received numerous academic and clinical recognitions, including placing first in the national research competition at the 88th Annual American Association of Oral and Maxillofacial Surgeons meeting and the Medical Staff President's Award from the Department of Surgery at the Hospital of St. Raphael in 2006. He is currently a lecturer at Harvard School of Dental Medicine. He also serves on the board of directors for American Academy of Implant Dentistry (AAID) and as a member of the E-Poster Committee for Academy of Osseointegration (AO) and a member of the CE Committee for Massachusetts Society of Oral and Maxillofacial Surgeons (MSOMS). Dr. Koo has been involved in the beta testing of Sirona Galileos (CBCT) with face scanner and is a key opinion leader for Dentsply Sirona, Straumann and Dentium. He is considered one of the leading experts on 3D guided implantology and has lectured extensively on the use of this technology from the diagnosis and treatment planning phase to the final surgical and prosthetic execution phase both nationally and internationally. He is passionate about safety and precision in dental care to improve the quality of life of not only the patients, but also the clinicians and all the staff involved. With that vision, he founded a study group, the Academy of 3D Connection in Osseointegration to facilitate optimal communication between academic, corporate and private clinical settings. Dr. Koo maintains a private practice limited to oral and maxillofacial surgery in Wayland, Massachusetts.

The participation of this speaker has been made possible through support from Dentsply Sirona Implants.
